adquio | SUPERVISION AND CONTROL

Adquio SCADA Cloud

Web-based building control

Product: Adquio SCADA Cloud
Category: ADQUIO · SUPERVISION AND CONTROL

DESCRIPTION

Adquio SCADA Cloud is a cloud-hosted supervision and control platform from Adquio. It lets you design graphical screens connected to Adquio variables, view current data and historical trends, and operate available systems from a web browser.
Projects that need to view and operate one or more installations through the web, share access among several users, and delegate platform hosting and maintenance.

FUNCTIONS

Visual design

Create custom screens with plans, backgrounds and graphic elements to represent each space.

Connected controls

Link controls to Adquio variables to change statuses and act on the available equipment.

Trends

View real-time values and review historical data with charts integrated into the plans.

Web access

Open the interface in a browser and view the installation without installing a specific program.

Managed service

The monthly fee includes hosting, support, maintenance and platform updates.

WHO IS IT FOR

Remote operation

View and manage installations from a browser, even when you are not in the building.

Buildings and offices

Brings the systems and data of each space together on graphical screens.

Technical integrators

Configure screens and link their controls to the available Adquio variables.

Maintenance

Review historical trends to understand how the installation evolves.

Shared operation

Allows simultaneous access for up to 30 users to any connected installation

Lighting and energy

Display statuses and consumption on plans to make daily monitoring easier.

WHEN TO CHOOSE SCADA CLOUD

Choose Adquio SCADA Cloud if you need to view and control one or more installations through the web, share access among several users, and review current and historical data on plans. The platform is hosted on Adquio servers and offered as a monthly service with support and maintenance.

→ **Web access**
Access the platform with a browser, without installing a SCADA application on each computer.

→ **Custom screens**
Design views with plans, shapes, images, controls and pop-up windows.

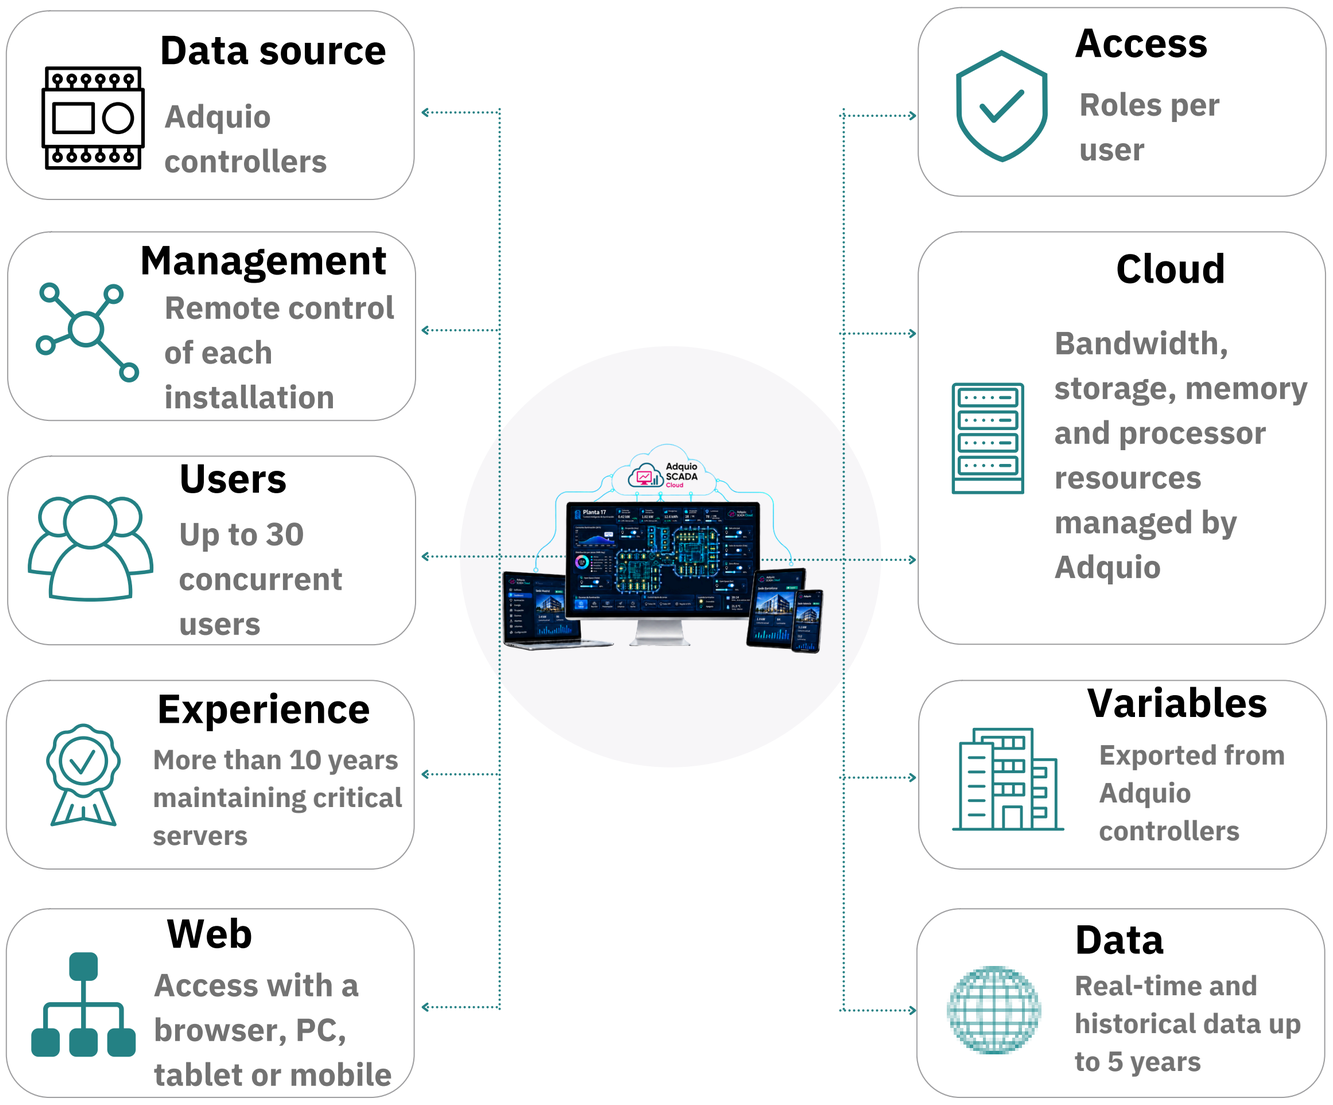
→ **Management outside the building**
Cloud hosting lets you view the installation from locations with an Internet connection.

→ **Multiple users**
Up to 30 concurrent users per installation.

→ **Maintained service**
The monthly fee includes hosting, support, maintenance and updates.

→ **Current and historical data**
View variables in real time and add trend charts over the plans.

INSTALLATION INTEGRATION



FUNCTIONAL DATA

Product	Adquio SCADA Cloud
Platform	Cloud service
Access	Web browser
Users	Up to 30 concurrent users
Visualisation	Screens and plans
Includes	Support and maintenance
Data	Real-time and historical data
Updates	Included in the service
Design	Graphic editor
Control	Adquio variables
Trends	Charts on plans
Service	Monthly fee
Connection	Internet
