WHEN TO CHOOSE VISIONCORE

Adquio VisionCore brings together IP cameras in a web interface to view live video, review recordings and link video events to building automation.

It is designed for facilities that need to consult video alongside the building's status and operation. Choose Adquio VisionCore if:

- **You need live video outside a proprietary, closed system.**
Live video, event connection with control and saved views
- **You need video to interact with your control system.**
And trigger lighting scenes, act on climate control, open a door or any other event.
- **You need a recording history**
and want to search it conveniently from your computer. No need to access a complex and usually outdated system.
- **You want absolute integration with controllers and other systems**
Your cameras integrated into the dashboards of your screens, your supervisor or your SCADA system.
- **You want a modern interface**
Fully web-based, translated into 13 languages, with dark, light and automatic modes.
- **You are interested in a secure system**
Access from a browser according to permissions, access credentials and secure communications, even during transmission from each camera.

INSTALLATION INTEGRATION

FUNCTIONAL DATA

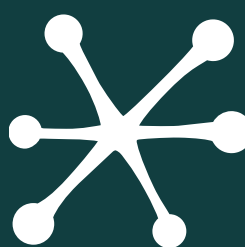

Reference	ADQ-VSC
Power supply	12V DC · Power supply included
RS485	2 ports · 1,200 to 115,200 bps
Ethernet	2 WAN + LAN, all 1 Gb/s
WiFi	Wi-Fi 4 (802.11n) · 2.4/5 GHz
Processor	i5 5200U · 2.2/2.7GHz · 2C/4T
Memory	8G
Storage	250 GB NVME + 2 TB SSD
Op. temp.	0–60°C
Protocols	ONVIF, RSTP, MJPEG, RTP/UDP, HTTPS/TCP, TCP, SMTP
Cameras	Up to 16 ONVIF/RSTP
Certifications	CE and RoHS
Compatible with	Adquio SCADA, Adquio Screens, Adquio Controllers and Adquio Nexus
