

Adquo Nexus

**Remote access
to your Adquo ecosystem**

Product: Adquo Nexus

Category: ADQUIO · SERVICES

DESCRIPTION

Adquo Nexus provides access to Adquo controllers and Adquo SCADA Server from anywhere with an Internet connection. Bring operation and support to installations that need to retain local security.

Use a computer, phone or tablet browser and the custom domain configured for the project. Encrypted connectivity and username/password access simplify remote ecosystem management.

BENEFITS

**Global
access**

Access Adquo devices from a remote Internet-connected location without travelling to the installation.

**Through your
browser**

Work from a computer, phone or tablet using your custom domain and access credentials.

**Remote
support**

Check status, review configuration and operate devices according to project permissions.

**Protected
environment**

Encrypted connectivity supports remote access while retaining the security required by the local installation.

**Grow with
your project**

Adapt the service to the devices and locations your technical team needs to manage.

TYPICAL APPLICATIONS

**Building
maintenance**

Inspect and diagnose installations without unnecessary travel.

**System
integrators**

Access customer equipment for authorised configuration and support.

**Distributed
installations**

Work with devices across locations according to the deployment.

**Remote
SCADA**

Access Adquo SCADA Server through the configured Nexus connection.

**Diagnostics
and follow-up**

Review data and status to prepare maintenance actions.

**Support
teams**

Enable authorised staff to access each project.

Is this product or service part of your project?

Contact us and we will prepare a proposal for your installation.

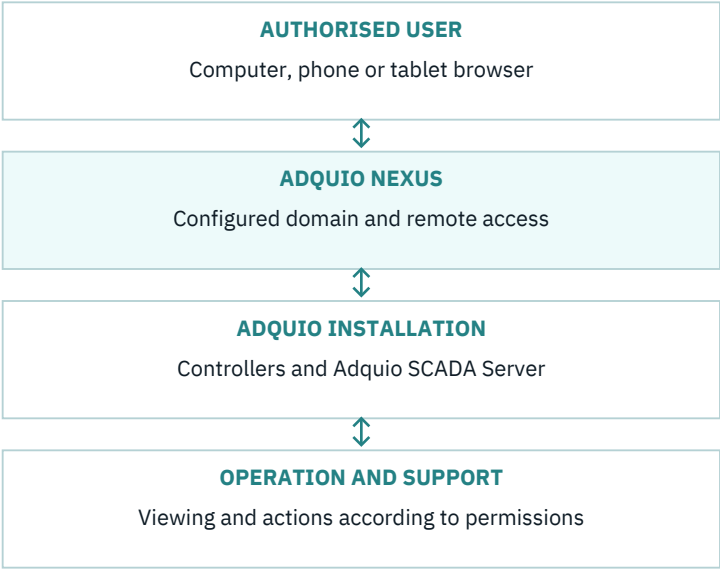

WHEN TO CHOOSE ADQUIO NEXUS?

Adquo Nexus provides access to Adquo controllers and Adquo SCADA Server from anywhere with an Internet connection. Bring operation and support to installations that need to retain local security.

Scenarios where it adds value:

- **You need access to a remote installation**
Use Nexus to access Adquo devices through an Internet-connected browser.
- **The customer requires local-network security**
Design remote access around the project architecture and credentials.
- **Your team supports several locations**
Organise access to ecosystem equipment at each installation.
- **You want support without travelling**
Inspect devices and carry out permitted tasks from a remote location.
- **You need access to Adquo SCADA Server**
Include SCADA Server monitoring in the Nexus deployment.
- **You need a straightforward access experience**
Use the custom domain and authentication configured for your project.

TYPICAL ARCHITECTURE

Connectivity, accessible devices and credentials are configured for each installation. Remote access requires Internet connectivity and project authorisation.
